

1 Release Notes 1.2.1

the main focus of this release was to fix the

- compatibility issues to Version 1.1.2 and 1.0.4
- correct message referencing
- correct function with different Locations

The following changes are part of this Bugfix Release

1.1 Connector

- SHIP3-419: added an API (`/ship/api/1/0/actors/ofParticipant?participantGln=..&date=...`) to read all actors connected to a participant

1.2 RAC

- SHIP2-175: fix an issue where 01_01_070 and 01_01_130 cannot be replied to if both connectors are using messages with version 1.2.1
- SHIP2-191: RAC showed actors with the same GLN as the configured Participant even if the actor is not connected to the participant
- SHIP2-231: RAC didn't show actors connected to the configured Participant if the actors have a differing GLN
- SHIP3-307: include XML documentation in the Swagger documentation
- SHIP3-319: streamline Swagger documentation

1.3 Business Rules

- [SHIP3-399](#): correct message references for messages from eCH-0237
- SHIP3-406: could not send updates to 01_01_140 if LERB uses message version 1.2.1 and CB uses message version 1.2.2
- SHIP3-407: corrected transformation script (1.2.2 to 1.2.1) for cancel message for 01.02.040

1.4 Central Services

1.5 UI Configs

- SHIP2-189: correct message references for messages from eCH-0236
- SHIP2-190: correct message references for messages from eCH-0237
- SHIP3-479: sending an answer to an updated 01.01.130 contained wrong value in the "messageReference" field
- SHIP3-480: generate correct "messageReference" field even if multiple involved costbearers in treatmentcase

1.6 Reference Data

- SHIP3-330: corrections to the "refusalReason" for 01_01_140 messages (canton)
- SHIP3-411: corrected validity interval for valueset "side" in reference Data and message specification

1.7 Various

- SHIP3-395: changes to message specification eCH-0237, restrictionReasonGroup without freetext. Message 04.02.050, requestedDate new with Valueset requiredData2Service
- SHIP3-396: message specification 1.2.3 set to active
- SHIP3-447: created new "AWB": do not send two or more attachments with the same name in one message
- SHIP3-451: message specification corrected value for valueset "requiredData3", selection description "Freitext"

1.8 Included Support Tickets:

- CSC-1855 Error with RAC dropdown with Insel locations
 - SHIP2-231: RAC didn't show actors connected to the configured Participant if the actors have a differing GLN
 - SHIP3-419: added an API (`/ship/api/1/0/actors/ofParticipant?participantGln=..&date=...`) to read all actors connected to a participant

1.9 Valuesets

Using dummy ZSR Number is a short-term solution until a structured solution in the eCH Standard takes place. If the ZSR Number is unknown or self-referrer the following numbers can be used.

ZSR	de	en
J480703	unbekannt	unknown
H480701	selbstzuweiser	self-referrer

1.10 Currently valid versions

The following overview shows the currently used versions.

Components	Released Version	Compatible Versions	Storage Location
SHIP Services			
• SHIP Connector	1.2.1	RAC 1.2.1 Message Verison 1.2.1, 1.2.2, 1.2.3	SHIP-standard
• SHIP Connector Database	same mySQL		part of SHIP Connector
• SHIP RAC	1.2.1	Connector 1.2.1 Message Verison 1.2.1, 1.2.2, 1.2.3	SHIP-standard
• SHIP RAC Database	same existdb		part of SHIP RAC
• LDAP / AD Interface			part of SHIP RAC
• Business Rules eCH-0236	1.2.2,	1.2.1	
• Business Rules eCH-0237	1.2.3	1.2.3	part of SHIP Connector (from Central Service)
• Referencedata ValueSet	1.0	1.0	part of SHIP Connector (from Central Service)
• UI Configuration eCH-0236	1.2.2	1.2.1	part of SHIP RAC
• UI Configuration eCH-0237	1.2.3		part of SHIP RAC
• API Interface Admin API	1.0		part of SHIP Connector
• API Interface Sender API	1.0		part of SHIP Connector
• API Interface Central Service API	1.0		part of SHIP Connector
• API Interface Receiver API	1.0		part of SHIP Connector
Documentation			

• eCH-0234 – SHIP Data standard benefit cases Administration Healthcare	1.0		eCH
• eCH-0235 – SHIP Message standard	1.0, 1.1		eCH
• eCH-0236 – SHIP Process standard "Hospital stationary"	1.0		eCH
• eCH-0237 – SHIP Process standard «Care»	1.1		eCH
• Data-privacy concept	1.0		SHIP-services
• IT Security-Concept	1.7		only on demand
• application regulations	7.0.0		SHIP-standard
• Message specification	1.1.1		SHIP-standard
• RAC User Guide	1.1.1		SHIP-services
Third-Party-Produkte			
mySQL - Windows	5.7.19		part of SHIP Connector
mySQL - Linux	5.7		part of SHIP Connector
eXistDB	5.1.1		part of SHIP RAC
Java - Windows	8		
OpenJDK - Linux	8		

the Colored Objects are available in a new Version.

RED are mandatory changes

YELLOW Changes should be adapted.
